

Trevor Nance

trevornance7@gmail.com | github.com/nancetrevor | trevornance.dev

CORE SKILLS & HIGHLIGHTS

- Build scalable backend systems and data-driven applications using Go, Python, and SQL, with a focus on performance and reliability
 - Design and implement inventory, forecasting, and ERP solutions that directly impact operational efficiency and cost reduction
 - Experienced in full-stack development, integrating APIs, databases, and front-end interfaces into cohesive systems using Javascript, React, HTML, and CSS
-

PROFESSIONAL SUMMARY

Software developer with experience building enterprise-grade systems and data platforms. Strong focus on backend architecture, forecasting models, and operational software that aligns with real business outcomes.

TECHNICAL SKILLS

Languages & Frameworks:

Go (REST APIs, concurrency)

Python (automation, Flask, FastAPI)

SQL (PostgreSQL, MySQL)

JavaScript (React, front-end fundamentals)

Systems & ERP:

Odoo

Forecasting systems

Inventory & procurement modeling

Relational database design

Infrastructure & Tools:

Docker

Linux

Git/GitHub

VPS Hosting

PROFESSIONAL EXPERIENCE

Last Frontier Hospitality

Software Developer (2023 – 2026)

- Developed a custom Odoo-based ERP system to manage store operations, inventory, and procurement workflows
- Built forecasting models to project daily sales and production needs, improving planning accuracy
- Implemented automated inventory and purchasing systems driven by forecasted demand
- Designed ingredient-level production planning to reduce waste and optimize ordering efficiency
- Coordinated across operations, purchasing, and development teams to align technical solutions with business needs

Ecotile

Software Developer Intern (2022-2023)

- Built and maintained inventory management features to improve stock tracking accuracy and internal workflows
 - Contributed to a customer-facing web application for browsing products and viewing tile specifications
 - Developed backend functionality connecting inventory systems with front-end interfaces
 - Assisted in debugging, testing, and improving application performance and reliability
-

Health Care Hospitality Group

Dietary Manager (2017-2020)

- Managed food service operations, including staff, scheduling, and vendor coordination
 - Implemented inventory control systems that reduced waste and improved cost efficiency
 - Oversaw procurement processes and ensured compliance with healthcare regulations
-

PROJECTS

Custom Store Management ERP (Odoo)

- Designed forecasting modules for daily production and inventory planning
- Integrated sales data with automated purchasing workflows

- Built ingredient-level inventory tracking tied to consumption models

MMA Data Platform

- Designed a relational PostgreSQL database for fighters, events, and fight statistics
 - Built a RESTful API in Go using net/http to serve structured data
 - Containerized the system using Docker for consistent development and deployment
 - Developed a front-end using JavaScript, HTML, and CSS
-

MINI PROJECTS

CLI Snippet Manager

- Built a CLI tool in Go to manage reusable command snippets
- Implemented a TUI using BubbleTea

CLI Journal

- Developed a terminal-based journaling tool with search and file management features
 - Built in Go with support for structured note retrieval
-

EDUCATION

Western Governors University

Bachelor of Science in Computer Science — 2022

Johnson & Wales University

Bachelor of Science in Nutrition — 2016
