

# Trevor Nance

Software Developer

409-670-3677 | trevornance7@gmail.com | Beaumont, Texas | linkedin.com/in/trevor-nance | github.com/nancetrevor

## PROFESSIONAL OVERVIEW

---

Backend software developer with hands-on experience designing and deploying cloud-native systems on AWS. Proven track record translating messy operational problems into clean, automated, data-driven solutions, from custom ERP deployments and AI-assisted search workflows to production REST APIs and ETL pipelines. Comfortable owning systems end-to-end, from infrastructure through backend services to observability, monitoring, and cost optimization.

## CERTIFICATIONS

---

- AWS Certified Solutions Architect Associate: Amazon Web Services | May 2026
- HashiCorp Certified: Terraform Associate | May 2026
- Network+: CompTIA | August 2026
- Security+: CompTIA | In Progress

## WORK EXPERIENCE

---

### Software Developer | Last Frontier Hospitality, New York City, New York

AUGUST 2024 – MAY 2026

- Architected and deployed a production Odoo-based ERP system supporting operations across 8 stores, centralizing inventory, purchasing, forecasting, production planning, and reporting.
- Built automated procurement and inventory workflows that converted nightly store counts and sales trends into daily ingredient forecasts and ordering recommendations.
- Developed Slack-integrated forecast reporting that sent daily ingredient and production guidance to store teams based on prior-night inventory and current sales trends.
- Built management dashboards showing cookie sales by day, week, month, and year, giving leadership clearer visibility into store performance and demand patterns.
- Developed inventory dashboards tracking incoming and outgoing stock through Odoo, improving visibility into ingredient usage, stock levels, and ordering needs.
- Helped reduce food cost at one store from approximately 28% to 19% over several months through improved inventory tracking, ordering controls, and usage visibility.
- Trained store teams and managers on how to use the Odoo system effectively, bridging in-store operational knowledge with software implementation.
- Integrated Amazon Bedrock and Amazon OpenSearch Service to deliver semantic and vector search across operational data, enabling AI-assisted analysis and retrieval for business insights.

### Operations Manager | Last Frontier Hospitality, New York City, New York

MAY 2023 – AUGUST 2024

- Oversaw operations across 8 stores with approximately 100 employees, supporting staffing, scheduling, inventory control, food quality, customer service, and team performance.
- Managed store operations generating approximately \$250K–\$350K in weekly sales during normal weeks and over \$500K–\$600K during high-volume weeks.
- Trained and coached store teams on operational standards, food safety procedures, guest experience, and efficient workflows during peak business hours.
- Monitored sales, labor, inventory, and waste trends to identify cost-saving opportunities and improve store profitability.
- Coordinated vendor relationships, ordering processes, and budget controls through personal workflows.
- Worked closely with leadership, vendors, managers, and store teams to improve execution, ordering accuracy, and operational consistency across locations.

### Junior Web/Software Developer | Ecotile, Union, New Jersey

JANUARY 2021 – MAY 2023

- Built and maintained a customer-facing inventory web application using Django, HTML, CSS, and JavaScript, supporting approximately 300–350 warehouse product listings.
- Connected the web application to an existing inventory management system, allowing updated product availability, stock levels, and product images to be displayed through an online catalog.
- Developed appointment scheduling and display request features for customers and tile stores, reducing manual coordination and improving sales workflow efficiency.
- Hosted and deployed the application on AWS, gaining hands-on experience with cloud-based web application deployment and production site maintenance.

409-670-3677 | trevornance7@gmail.com | Beaumont, Texas | linkedin.com/in/trevor-nance

- Managed food service operations for an approximately 80-bed healthcare facility operating around 90% capacity.
- Supervised and trained a team of approximately 10 employees across daily food service, sanitation, preparation, and service responsibilities.
- Managed Sysco vendor ordering and purchasing while keeping monthly food spending near an approximately \$8K budget target.
- Maintained compliance with food safety, healthcare, and state regulatory requirements.
- Implemented inventory control and ordering practices that improved purchasing efficiency, reduced waste, and supported consistent meal service.

## PROJECTS

---

### MMA Data Platform | fightdb.org

- Designed a normalized PostgreSQL schema modeling fighters, events, bouts, and fight statistics, optimized for analytical queries.
- Built a production-grade RESTful API in Go serving structured fight data to front-end consumers.
- Wrote Python and BeautifulSoup data ingestion pipelines to scrape, normalize, and load external data sources.
- Containerized the full stack with Docker for reproducible development and deployment environments.
- Developed front-end data visualizations with vanilla JavaScript, HTML, and CSS.

### CLI Snippet Manager | Go + BubbleTea

- Built an interactive terminal UI for creating, organizing, and retrieving reusable command snippets using the BubbleTea TUI framework.

### CLI Journal Tool | Go

- Developed a file-based journaling system with full-text search and time-based retrieval, demonstrating idiomatic Go file I/O and CLI design.

## EDUCATION

---

### Bachelor of Science in Nutrition | Johnson & Wales University, Denver, Colorado

**GRADUATED: 2016**

Boot.dev – Backend Developer Program | Go, Python, SQL, HTTP servers, REST APIs, Git, Linux, data structures & algorithms, backend fundamentals

## SKILLS

---

|                    |                      |                           |
|--------------------|----------------------|---------------------------|
| Go                 | Python               | SQL                       |
| JavaScript         | REST API Design      | Flask                     |
| PostgreSQL         | MySQL                | Relational Modeling       |
| AWS EC2 / S3 / RDS | VPC / IAM / Route 53 | CloudFront / Lambda / ELB |
| Amazon Bedrock     | OpenSearch Service   | RAG / Vector Search       |
| Terraform          | Docker               | Linux / VPS Hosting       |
| Git / GitHub       | Grafana / Prometheus | Ansible / Chef            |
